

Reinaldo Vicini

Quality & Engineering Leader · Systems Builder · 20+ Years Leading Teams, P&L and Technology · AI Systems Design · AI-Augmented QA · Playwright/TypeScript

rvicinip@gmail.com | +57 315 351 6152 | Colombia (Remote) | [linkedin.com/in/reinaldo-vicini](https://www.linkedin.com/in/reinaldo-vicini)

PROFESSIONAL SUMMARY

Quality & Engineering leader with 20+ years of technical and business leadership — from systems engineering to CEO/GM of a US\$20M manufacturer (350 direct + 150 indirect reports; grew it from US\$2M to US\$20M; joint ventures with Ford, Iveco, Mercedes-Benz and GM) — and a proven reinvention into technology. As sole owner of the platform QA function, I set its strategy, standards and release gates, and built an AI-augmented pipeline that converts Jira tickets into test cases and Playwright specs, recovering reproducible steps for ~80% of ~1,000 analyzed tickets and cutting per-ticket cycle time ~55% — always behind a mandatory human review gate. Expert in regression architecture, QA governance, observability-driven testing (log forensics, Elastic/Kibana), AI systems design, and a 5-dimensional quality strategy mapped to ISO/IEC 25010.

SKILLS

QA & Test Automation: Playwright, TypeScript, JavaScript, Python, Selenium, React, Node.js, API testing, E2E testing, regression testing, smoke testing, manual testing, test planning, test cases, test data management

AI & Agentic Systems: AI-augmented QA, agentic workflows, LLM evaluation, verification gates, human-in-the-loop review, knowledge bases / RAG, prompt engineering

Observability: log forensics, APM, Elastic, Kibana, telemetry, incident reconstruction, production log analysis

Strategy & Governance: quality strategy, regression architecture, test coverage matrix, QA governance, release management, 5-dimensional quality strategy (functional, performance, security, scalability, config), ISO/IEC 25010, TQM, APQP, 5S, lean verification

Leadership: team leadership, hiring and team building, cross-functional leadership, mentoring, stakeholder communication

Tools: Jira, Azure DevOps, Git, UiPath (RPA), MySQL, GraphQL, Express, WordPress

PROFESSIONAL EXPERIENCE

Newton Vision Corp · Revalize Software — Quality Engineering Lead / QA Architect (Sole Owner of Platform QA — Strategy & AI Pipeline)

USA (Remote) · May 2022 – Present

- Own the platform QA function end to end — strategy, standards, and release gates — as sole architect across 48 tenants and 8 environments (21 with full Playwright automation — 150+ specs, 115+ page-object models).
- Designed a 5-dimensional quality strategy (functional, performance, security, scalability, infra/config) mapped to ISO/IEC 25010; run selective regression by the quality matrix rather than full re-runs.
- Built a 7-stage AI-driven pipeline that turns a Jira ticket into analysis, test cases, and a Playwright spec in minutes — cutting per-ticket cycle time ~55%.
- Governed AI output: test factory at 75–85% precision behind a mandatory human review gate; zero auto-committed tests; anti-hallucination validation.
- Raised reproducible-step coverage from 1.1% to ~80% across ~1,000 tickets; every finding writes back to a reusable knowledge base so each cycle compounds.
- Reconstructed cross-tenant defects from raw telemetry (Elastic/Kibana); classified 436 error signatures; verified fixes are actually deployed via git ancestry + live version banner before testing.

VITT S.A.S. — Independent Associate, Frontend Development & QA

Medellín, Colombia (Remote) · Jan 2021 – 2023

- Delivered a 10-module React/JavaScript (ES6) frontend (Node.js, Express, GraphQL, React Query, WordPress/MySQL).
- Client engagement through VITT — QA Lead for the BASC application at POSDATA: QA policies, test-case design, acceptance-criteria verification, and a 3-person team (~300 bugs/sprint).

SEQUAL — Software Quality Assurance Engineer (Project KOQUI)

Medellín, Colombia (Remote) · Mar 2020 – Dec 2020

- First QA role — completed a basic QA course and was introduced to Scrum/sprint methodology; manual-tested a new development solo, finding ~50 bugs per sprint.
- Later ran Python + Selenium automation pilots; wrote test plans and user stories under SCRUM/Kanban; high bug-find rate organization-wide.

Interext Ltda — CEO / Founder

Cúcuta, Colombia · Aug 2015 – Mar 2020

Carrocerías Andinas C.A. — General Manager / CEO

Ureña, Venezuela · Jan 1999 – Feb 2020

- Built and led a multidisciplinary team; grew the company from US\$2M to US\$20M and embedded engineering + QA into joint ventures with Ford, Iveco, Mercedes-Benz, and General Motors.
- Implemented ERP (Exact Globe) and industry QA/manufacturing best practices; led IoT fleet management and sensor/PLC automation.

Comercial Carrocera Ltda — CEO / Founder

Bogotá, Colombia · Jun 1992 – Jul 2000

Distribuidora Internacional del Transporte — CEO / Founder

Ureña, Venezuela · Jul 1992 – Dec 1996

CORPES Centro Oriente — Management Information Systems Manager & Lead Developer

Cúcuta, Colombia · Aug 1988 – May 1992

- Implemented a six-state computing network (SCO UNIX); built a public project-tracking system (FoxBase Plus).

Carrocerías Andinas C.A. — MIS Manager / Lead Programmer

Ureña, Venezuela · Aug 1986 – Aug 1988

Coltejer S.A. — Programmer, Quality Control Department

Medellín, Colombia · Jul 1985 – Jan 1986

ExxonMobil — Project Intern, IT Department

Jul 1984 – Jan 1985

LEADERSHIP AT SCALE

US\$20M budget managed · 350 direct + 150 indirect reports · US\$2M → US\$20M company growth · joint ventures with Ford, Iveco, Mercedes-Benz and General Motors.

COMMUNITY & BOARD LEADERSHIP

Founding Executive Director, Corporación Recrecimiento — helped 100+ displaced small-business owners rebuild (2015–2018) · Board Member, Cámara Industria Venezolana Automotriz (2008–2015) · 29-year Rotary member.

EDUCATION

London School of Economics and Political Science (LSE) — MSc (Econ), Analysis, Design & Management of Information Systems · 1990 – 1991

Universidad EAFIT — Ingeniero de Sistemas (Systems Engineering) · 1981 – 1986

CERTIFICATIONS & AWARDS

Chevening / British Council Scholarship (1989) — funded postgraduate study at the LSE

ICFES 377 / 400 — top 1% national test scores, 2nd statewide

LinkedIn Skill Assessments passed: JavaScript, Python, React.js

LANGUAGES

Spanish (native) · English (bilingual) · Portuguese (professional) · German (basic)
